**favicon.ico** (favicon)

# Custom template classes

The Emma template was built using the Bootstrap framework <http://getbootstrap.com/> and contains the full set of the Bootstrap assets. All the Bootstrap basic features are applicable to the Emma HTML template.

For the better and quicker code modification we have set some useful custom css classes.

## Basic Colors

Use it for any text tag (h,p) or any other tag with a text content. You can easily change all of them in the style.scss or in style.css

### **.fontcolor-regular**

Default text color (#333333).

### **.fontcolor-invert**

The inverted text color for darker backgrounds (#ffffff).

### **.fontcolor-medium-light**

Medium text color (#eaeaea).

### **.hovercolor**

For “hover” elements (#E84855).

### **.accent-color**

Color for accent elements (#007EA7).

## Grey palette colors

**.color00** (white)

...

**.color13** (close to black)

## Background colors

Usable for sections and block containers.

**.bg-red**

**.bg-orange**

**.bg-green**

**.bg-blue**

**.bg-darkblue**

**.bg-cyan**

**.bg-yellow**

**.bg-l-grey**

**.bg-grey**

Grey palette backgrounds:

**.bg-color01** (white)

...

**.bg-color13** (close to black)

## Pre-defined blocks

Margins/paddings

**.e-block-regular**

Default vertical margins/paddings.

**.e-block-short**

Smaller vertical margins/paddings.

**.e-block-null**

Zero vertical margins/paddings.

## Typography

You can define it to any text tag or container.

Fonts

## Display

**.e-inline**  
**.e-block**  
**.e-inline-block**  
**.e-centered**  
**.e-hidden**

## Paddings for Containers

**.padding-side-30**  
**.padding-side-40**  
**.padding-side-50**  
**.padding-side-60**

# How-to and tips&tricks

## 1. How to set up the Google map?

- Open the assets/custom/js/script.js.
- Find the `/* Google map */` section.
- Find the following coordinates settings:  
`var $latlng = new google.maps.LatLng(52.5075419, 13.4261419),`
- make changes.

## 2. How to set up the Google analytics?

- Open the assets/custom/js/script.js.
- Find the `/* Google Analytics */` section.
- Uncomment the last two section lines.
- Fill your GA ID in the `'UA-*****-**'`

## 3. How to set up the PHP Contact Form?

- Open the email\_settings.php file
- Fill a desired e-mail address and subject
